Tire Safety Group awards annual support contract

New York, October 16, 2015 - Creative App Solutions, LLC, has recently entered into an annual support agreement to upgrade and provide technical support for the iOS Tire Facts™ mobile app by Atlanta based Safety Group LLC, Tire Safety Group. This agreement affirms the long-term working relationship between the companies.

Having over 30 years experience in software development, Kevin Messina founded Creative App Solutions with the mission to develop quality, affordable mobile apps for clients. Kevin and his team of professionals pride themselves on being much more than app developers; rather a partner in the process - before, during and after production.

Attorney Matt Wetherington founded Tire Safety Group with a mission of preventing wrecks caused by defective and poorly serviced tires through innovation and education. Tire Safety Group maintains the only database of recalled tires in the United States and enables consumers to detect recalled and expired tires through its mobile applications.
